

➤ **One-Stop Admission module:**

After aggregate calculation, applicable institutes and universities guidelines use case don't filter universities according to the aggregate previously calculated rather they show all universities regarding of his merit. E.g below aggregate calculated 80% so applicable institutes and admission guidelines use case instead of showing only those institutes above 80 merit; shows all universities existing in the database.

The screenshot shows a web application interface for the 'Academics' module. At the top, there are four tabs: 'Add Academics', 'Aggregate Calculator', 'Applicable Institutes', and 'Admission Guidelines'. The 'Aggregate Calculator' tab is active. Below the tabs, the title 'Calculate Your Aggregate' is displayed. The form contains three input fields with labels and values:

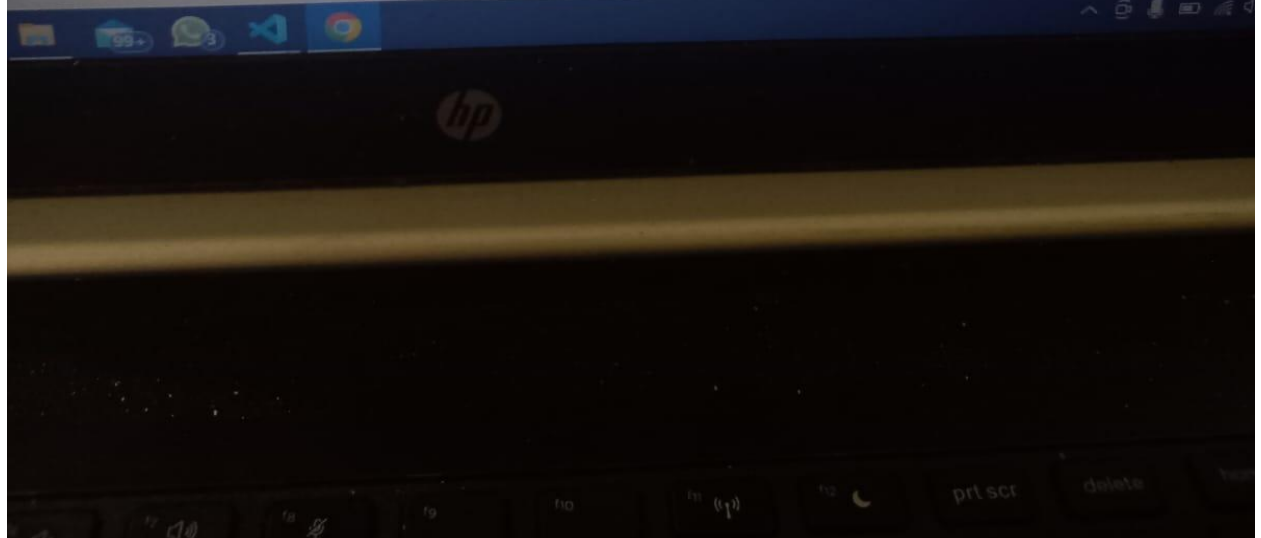

- Enter SSC Mark out of 1050 (10%): 1003
- Enter HSSC Marks out of 1100 (30%): 895
- Enter Entry Test Marks out of 100 (60%): 78

Below the input fields, the calculated aggregate is shown: 'Calculated Aggregate: 80.76%'. At the bottom of the form, there are two buttons: 'CALCULATE' and 'CLEAR'. The background of the form has a faint, stylized graphic of a person's head and shoulders.

Academics

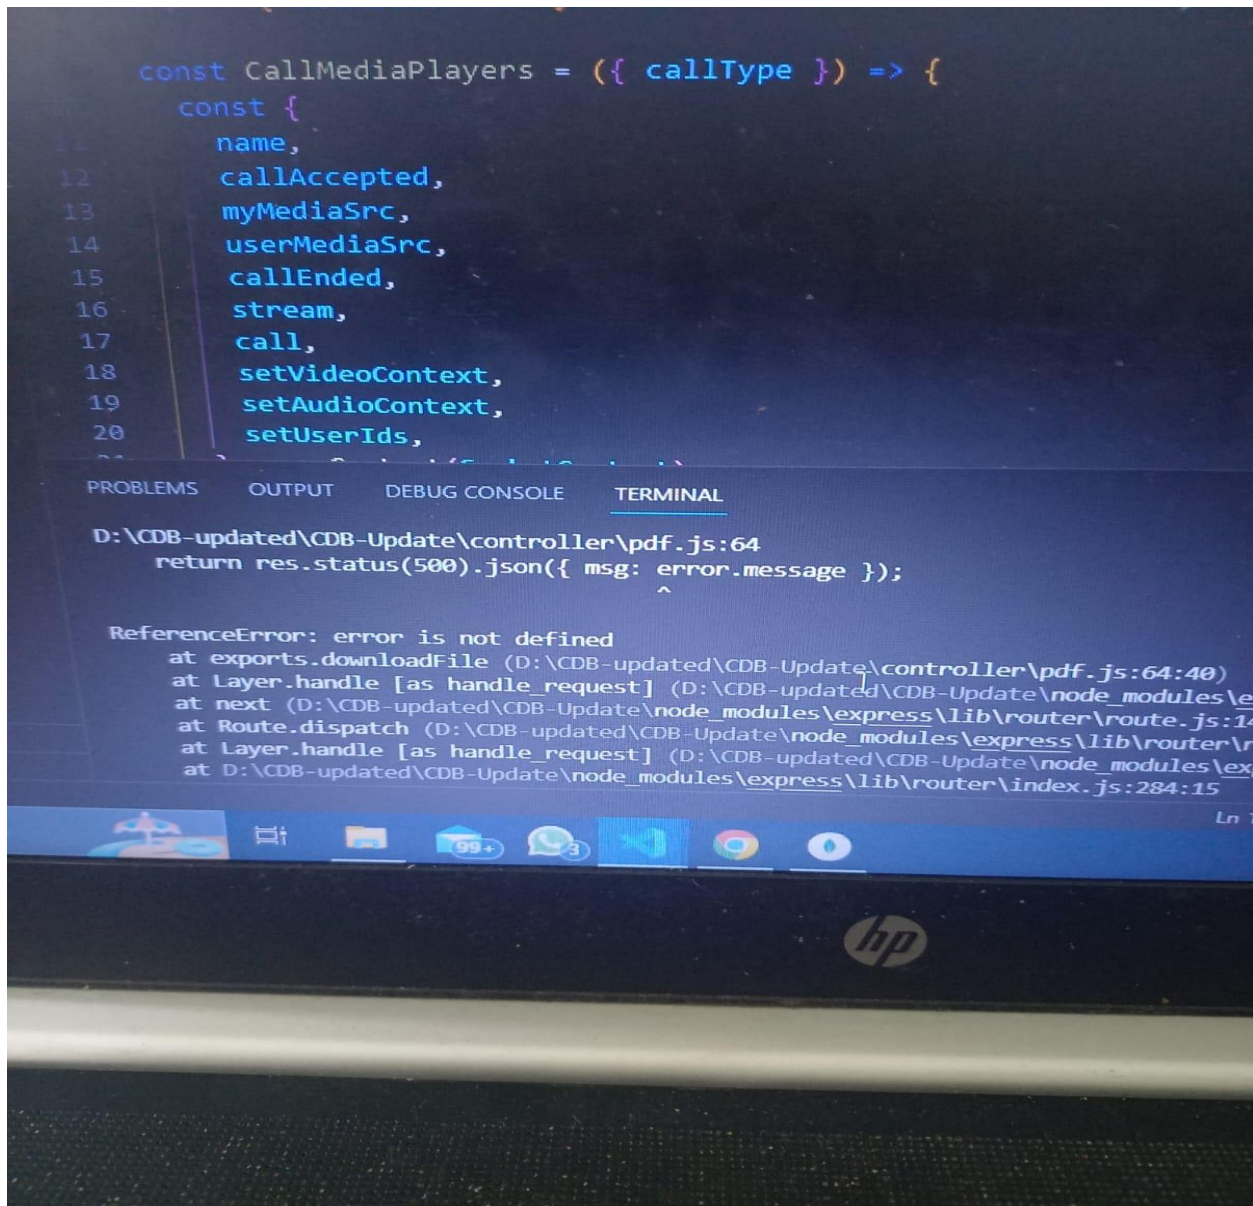

[Add Academics](#)[Aggregate Calculator](#)[Applicable Institutes](#)[Admission Guide](#)

NAME	SPECIALITY	MERIT	CI
Comsats	CS	85	Islam
PIEAS	Engineering	88	Lahore
Bahria University	Management Sciences	74	Islamaba

➤ PDF's issue

Any pdf when downloaded either from learning material module, CV or any other crashes whole app with below erroring contrast to displaying user the issue which occurred on screen.

➤ Web Sign-Up issue:

Creating new account on web isn't working; after entering all the required info and clicking on sign up; no message appears if account is created or not and on attempt to login with that credentials that were recently created message appears invalid credentials. Moreover 5th text box in below picture should be changed to a dropdown prompting user to select newly created account from a dropdown containing options of student, admin or employer rather than entering number mapped to each actor e.g 0,1,2.

Create Account

Full Name

fahad123@gmail.com

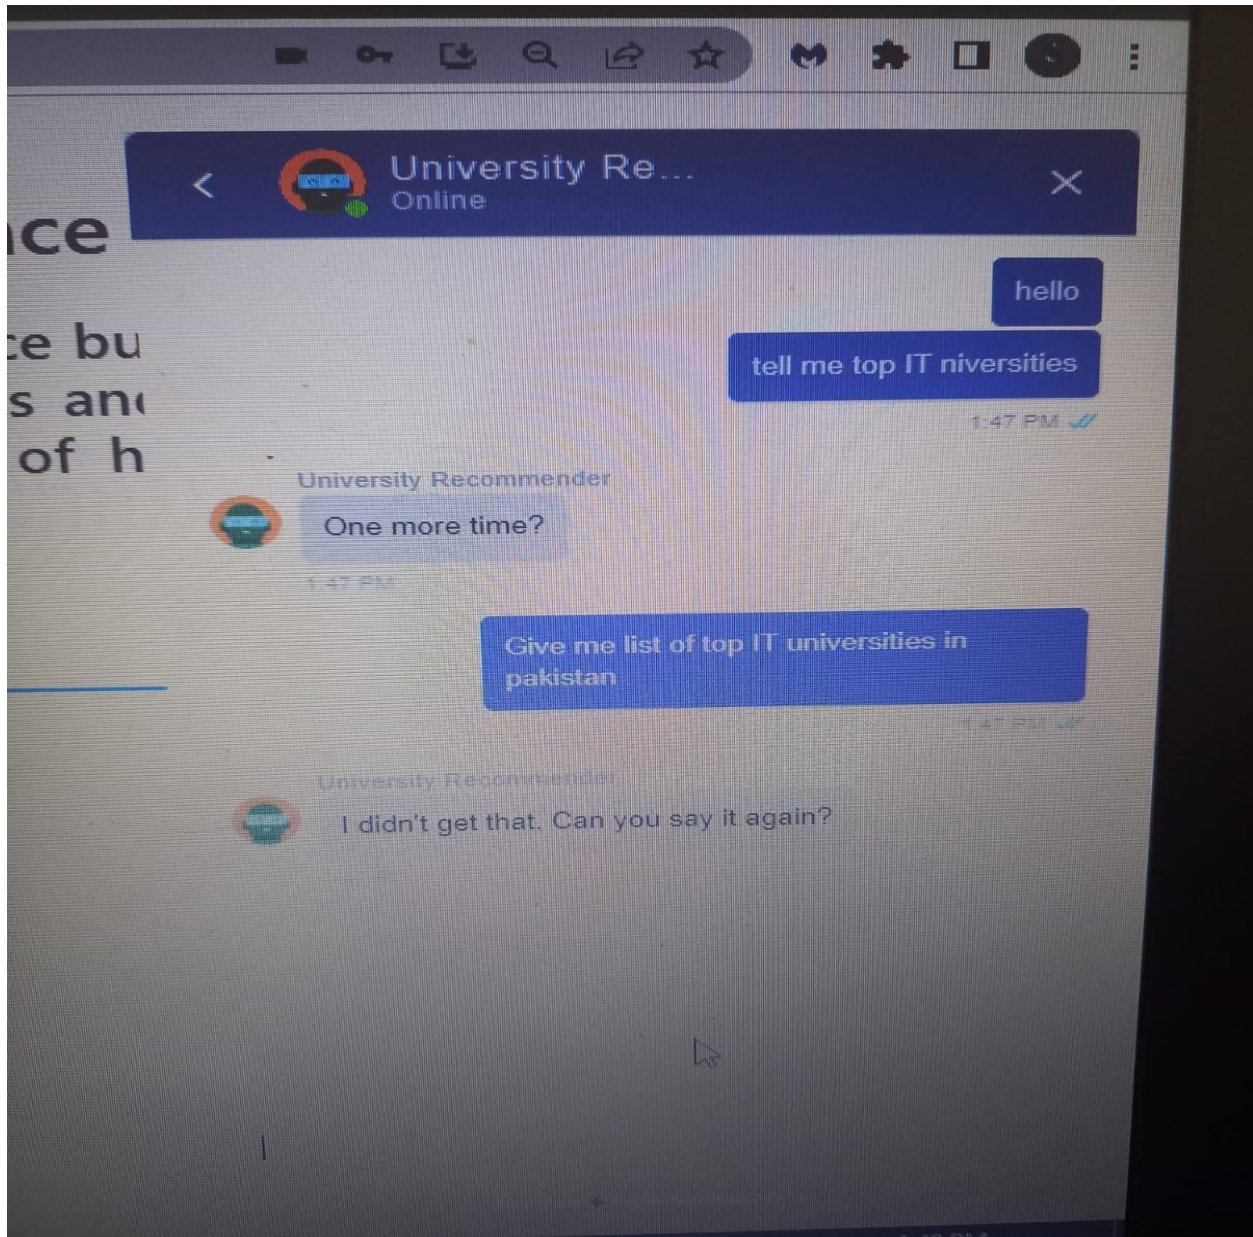

Confirm Password

☐ For Student, ☐ 1 For Admin, ☐ 2 For Employer

SIGN UP

➤ **Web Chatbot:**

Web chatbot not responding to queries; either with no response on asking a question or response with "Can you say it again?" e.t.c on being asked with a specific query.

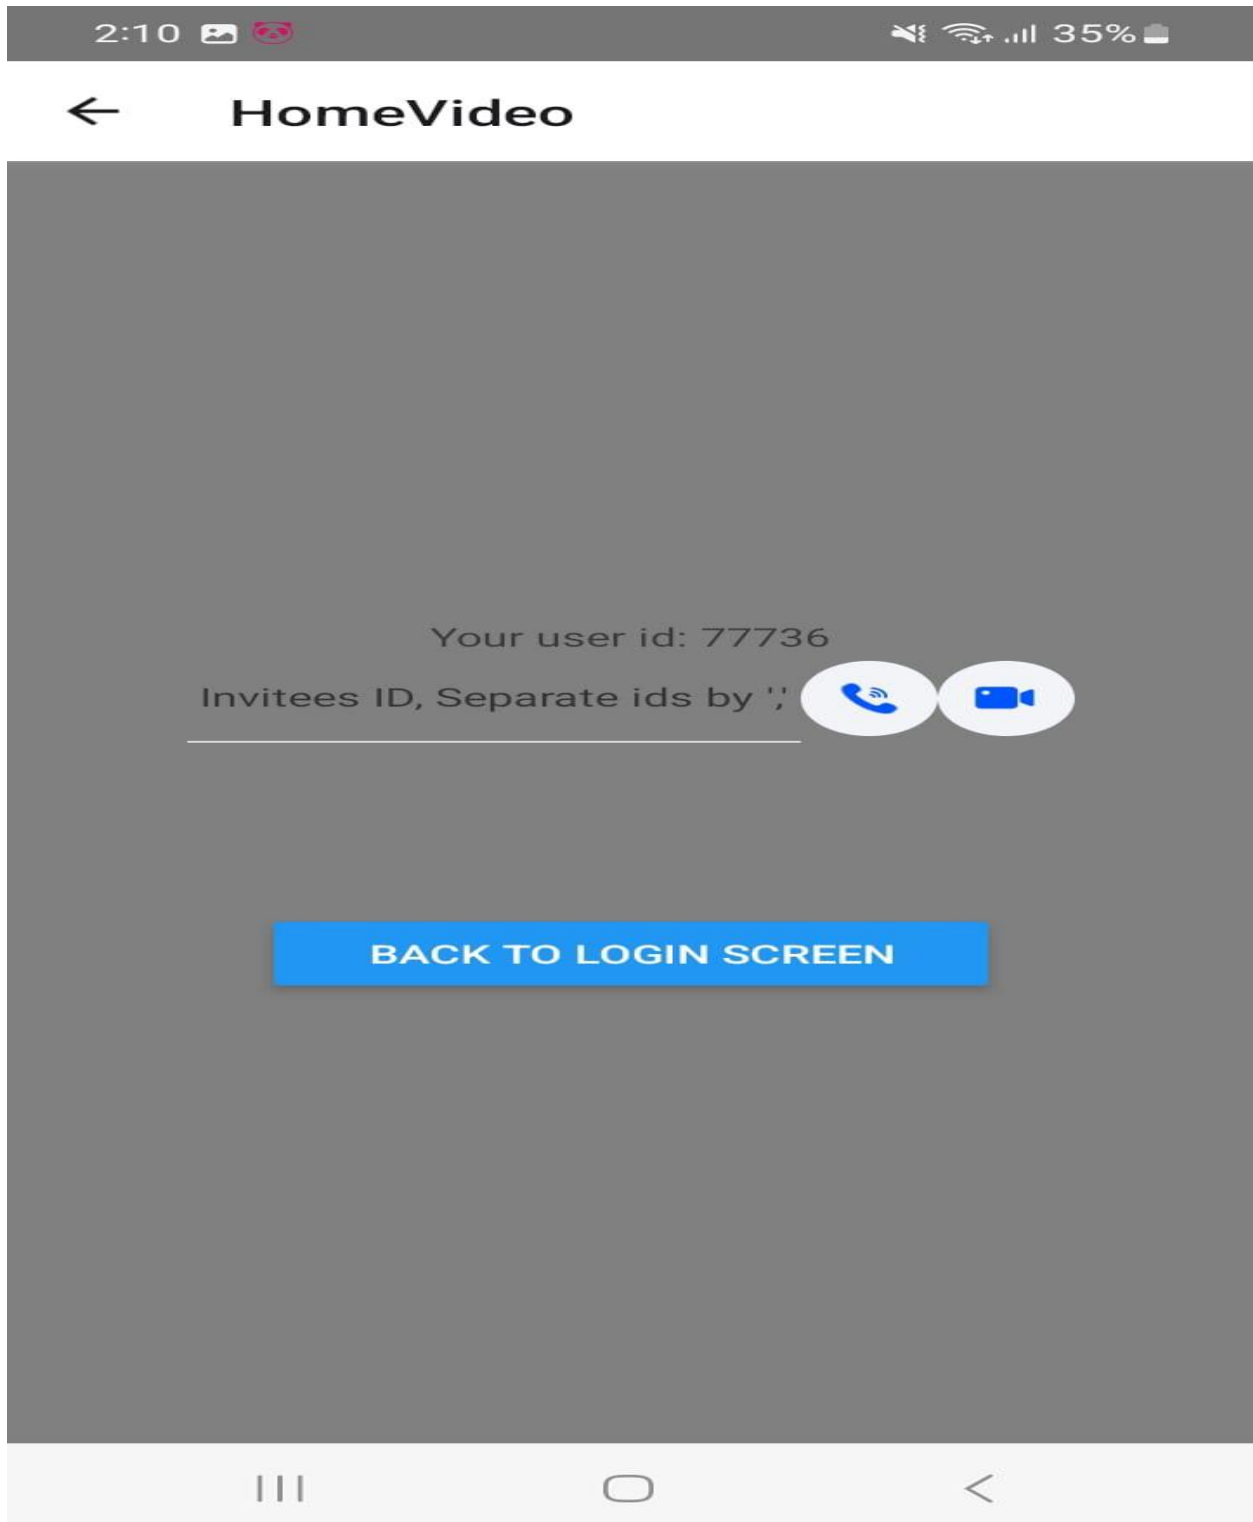

➤ **Mob chatbot:**

Mob chatbot also not responding to queries despite waiting several seconds for response. Clicking on lets go button as shown below does nothing.

➤ **Mob Audio/Video call:**

Mobile Audio/video call not working as below:

2:10

35%

LoginVideo

appID: 1267224405
userID: 77736
userName: user_77736

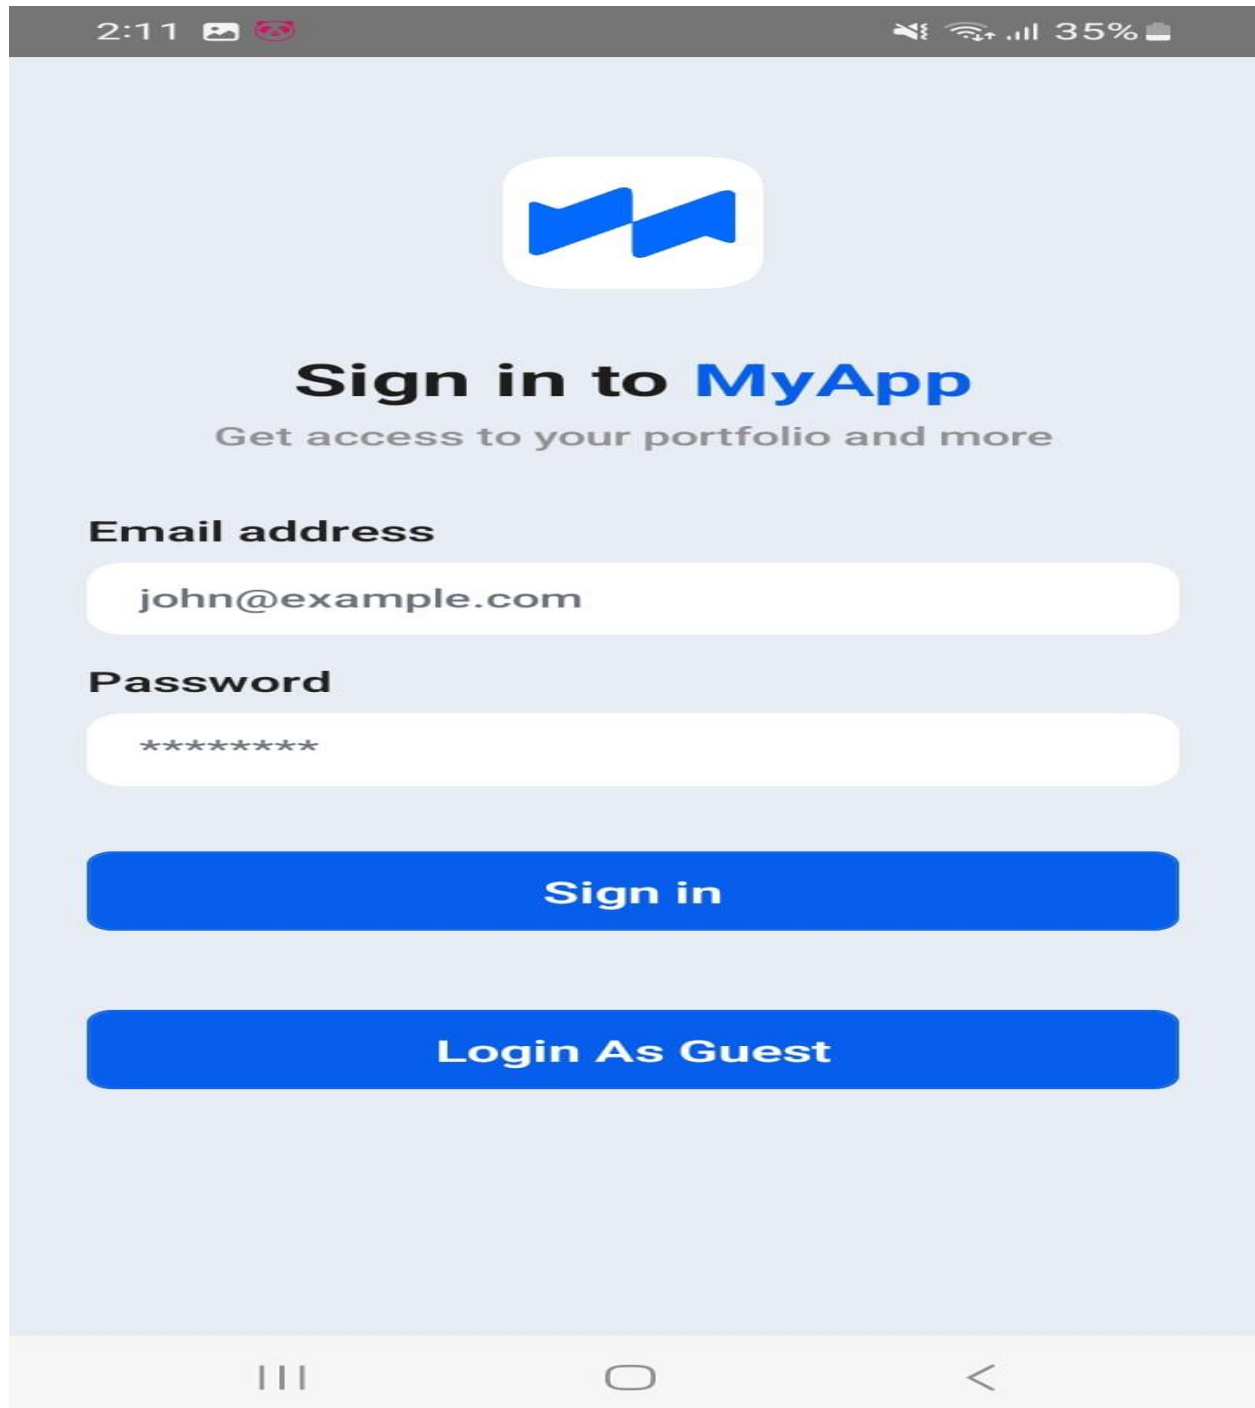

LOGIN

➤ **Mob Sign in Issue:**

Mob Sign in works only with ali23@gmail.com and its corresponding pass but doesn't login with any other credentials. Are these credentials hardcoded? No create account/Signup on mobile.

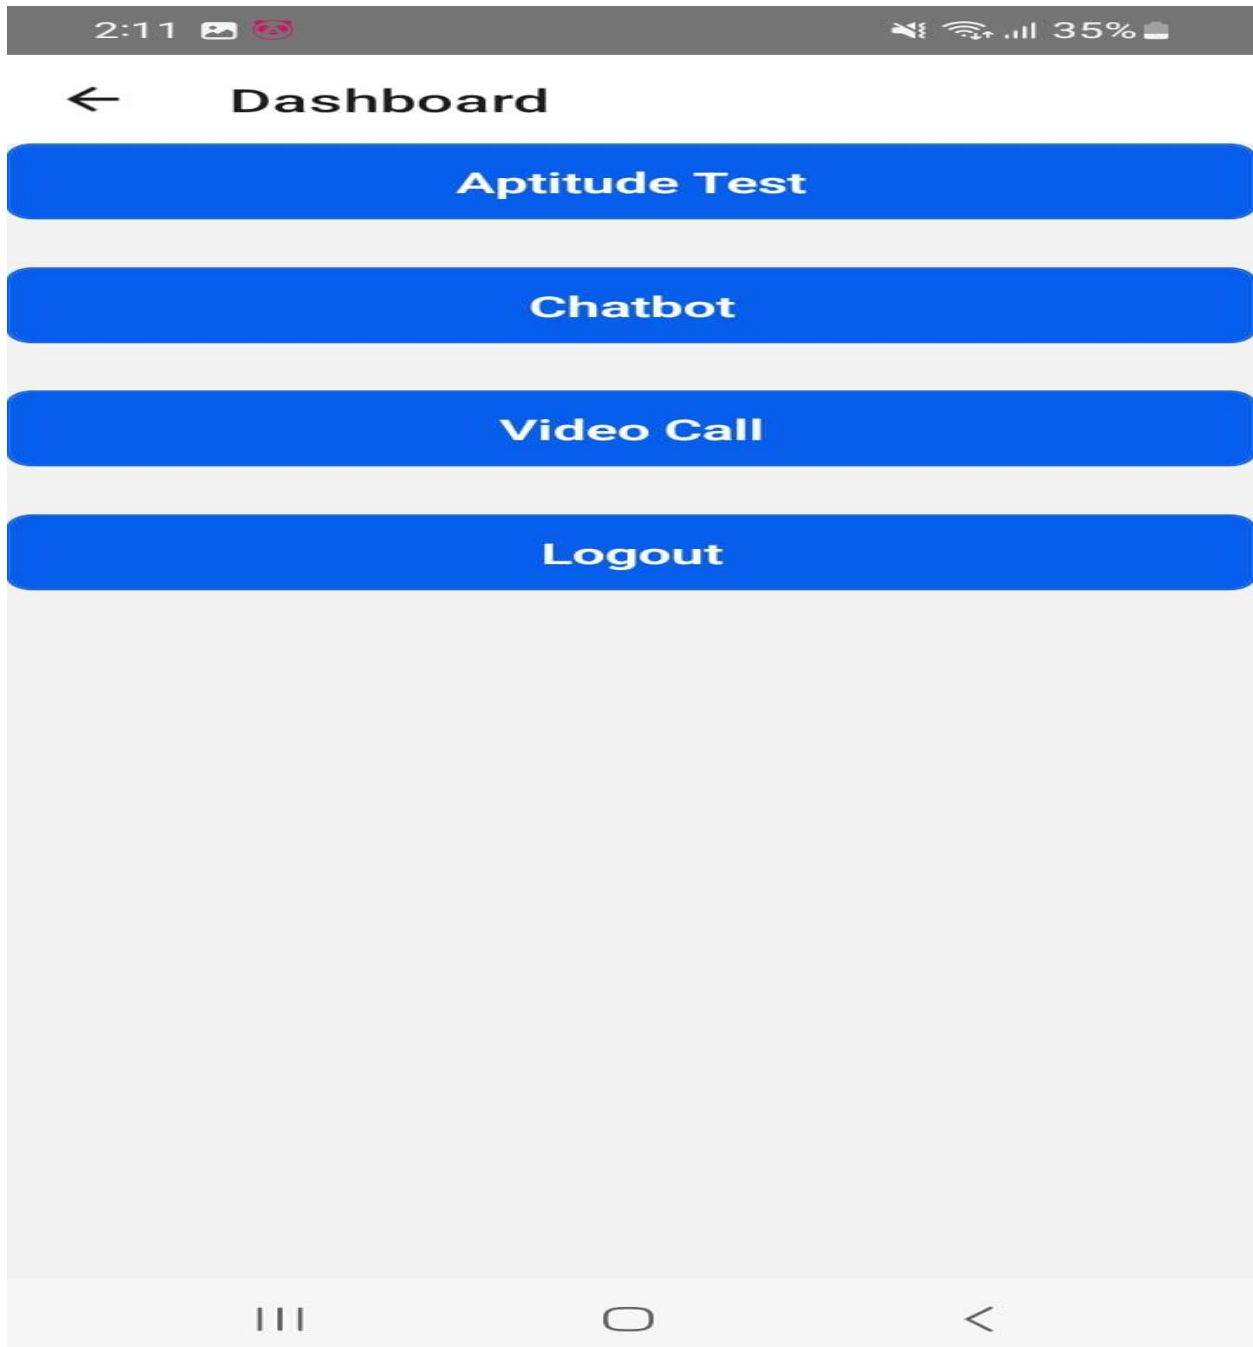

User should be able to sign up/create his own account and login with it rather than only login in with above credentials.

The screenshot shows a mobile application interface for logging in. At the top, the status bar displays the time 2:11, signal strength, Wi-Fi, and 35% battery. The app's logo, a blue stylized 'M' inside a white rounded square, is centered. Below the logo, the text 'Sign in to MyApp' is displayed in a large, bold font, with 'MyApp' in blue. Underneath, a subtitle reads 'Get access to your portfolio and more'. The login form consists of two white input fields with rounded corners. The first field is labeled 'Email address' and contains the text 'john@example.com'. The second field is labeled 'Password' and contains eight asterisks. Below the password field are two blue buttons with white text: 'Sign in' and 'Login As Guest'. At the bottom of the screen is a light gray navigation bar with three icons: a hamburger menu, a home button, and a back arrow.

➤ **Mob UI:**

No significant change in mob main menu/dashboard UI ; only padding and margins have been adjusted rather main menu screen should have been improved with better color schemes, animations, backgrounds or any other feature making UI catching.

➤ Job Portal Logic:

Abc user logged in as employer; when view the job listings that he created as shown below instead of just viewing it he should also be able to delete or edit his previously made job listing but no option for it.
